TRACECA Civil Aviation Safety and Security Programme

Airbus landing (Photo by Ian Britton)

Concept, design and production of website http://www.tracecacivilaviation.org for the EU TRACECA Civil Aviation Safety and Security Programme, based on content management system Typolight. Bilingual: English and Russian.

Client: EgisAvia / European Union, 2009

TYPOlight is a kind of derivate of the well-established open-source content management System (CMS) Typo3. It is a low-cost, rapid and easy-to-use alternative for smaller websites. Many already integrated modules (news, calendar, forms, etc.) have quickly made TYPOlight one of the most popular open source content management systems on the market. http://typolight.org
