

Books

Sometimes we have the opportunity to layout and/or produce a proper book publication, like the report on the regional conference "Le partenariat avec l'Europe". We also created master layouts for book productions, e.g. the layout for the Algerian National Environmental Report.

As early as in 1988 Julien Biere produced the first high-end photo book for the German speaking market using a desktop publishing software – an innovation in those days (Kodak Photobook Award of the year 89). Three more high-quality books followed. See: [The Author](#)

Although our focus of work has shifted towards audiovisual and online media, we are still capable of producing state-of-the-art books as part of a crossmedia communication strategy or as stand-alone product.
