

# TRACECA Civil Aviation Safety and Security Programme

Concept, design and production of website <http://www.tracecacivilaviation.org> for the EU TRACECA Civil Aviation Safety and Security Programme, based on content management system Typolight. Bilingual: English and Russian.

Client: EgisAvia / European Union, 2009

TYPOlight is a kind of derivate of the well-established open-source content management System (CMS) Typo3. It is a low-cost, rapid and easy-to-use alternative for smaller websites. Many already integrated modules (news, calendar, forms, etc.) have quickly made TYPOlight one of the most popular open source content management systems on the market. <http://typolight.org>
